1.	**Introspection Discussion** 　　This week we had a thorough discussion on our feedback of proposal, we summarize 2 obvious shortcommings of progress we are currently on. 　　First, we need to clear and optimise our division of work for the team. We divide our work into 3 stages as follow. 　　Then, we test our GUI, we apply the BootStrap to make the GUI more beautiful. We add a search algorithm to provide the function of search any doctor and pet information. We test our server and fix some bugs to make it more stable. ## Stage One(From week 6 to week 9) 1. Hospital Introduction (including branch introduction) - Interface completed 2. Doctor introduction - Interface completed 3. Login interface - Interface completed 4. Registration interface - incomplete 5. Management interface - function completion 6. Personal information interface - incomplete 7. Pet interface - incomplete 8. Appointment interface - incomplete ## Stage Two(From week 9 to Week 11) 9. Pet details interface 10. Chat interface 11. Patient queue interface seen by doctors ## Stage Three(From Week11 to later) 12. Based on the residual neural network, the pet category recognition is added to the seventh interface. The user uploads the pet picture and automatically recognizes the pet 1 variety 13. Natural language processing is added to the second interface, and the doctor's introduction displays the results of emotional analysis of user evaluation 　　Secondly, we need to make our project unique. Therefore, we decided add 2 function applying Natural language processing and Image recognition to improve customer's experience we have already finish our core module.

2.	Questions, issues? • There are minor problems with the IK binding to the skeleton. • What should be included in our document. • How to make a video to demostrate our project.
3.	We would like feedback on… We make a plan about the next six weeks. We want some opinions towards this plan. Is it realistic, or is there anything we forget to make plan
4.	What we plan to do this week: 1. Carefully analysis the plan about next six weeks. 2. Implement more functions about the website 3. Make the database better 4. Consider something related to security 5. Deploy the latest version on the server
